

# ShoreFit Launches Critical Product for Rescue Efforts in Warehouse Disasters

The rarity and complex aftermath of a pallet rack collapse leaves rescue professionals inadequately equipped for such a scene.

Plainfield, Indiana, October 8, 2024 — There are well over a million warehouses in the United States, housing billions of square feet of steel pallet racking. Those numbers continue to rise daily, as does the risk of a catastrophic pallet rack collapse. This rare but deadly event creates a tangled, unstable debris field like no other – and which no existing rescue apparatus is specifically designed to handle. The **ShoreFit Shoring Strut to Pallet Rack Adapter** is the patent-pending rescue solution that establishes a sturdy, secure, multi-plane connection for shoring strut engagement with pallet rack frames, and has been painstakingly engineered to work with major shoring strut brands.

A pallet rack collapse can happen suddenly and without warning. In this event, a damaged frame ignites a chain reaction that leaves a chaotic web of steel components woven into the wreckage of all the pallets of goods which they were previously holding. The aftermath of such an event is at a scale that is hard to imagine – and impossible to precisely train for. Further complicating critical rescue efforts, the shoring strut that rescue teams would instinctively reach for is not compatible with pallet rack frames.

**SO, WHAT NOW!?!** You need a safer way to reliably engage these compromised structures. You need **ShoreFit!**

ShoreFit features everything needed to securely connect your shoring strut to a collapsed pallet rack!

**CONNECT TO UPPER RACK**

**CONNECT TO LOWER RACK**

**CONNECT TO YOUR STRUT BASE**

Developed by a team of experts with decades of experience in rescue response, warehouse safety innovations, pallet rack maintenance, and collapse prevention, ShoreFit provides everything first responders need to create a secure entry triangle for pallet rack collapse rescue.

“While rare, these collapse disasters do happen more than most would believe,” said Daniel Klinger, Vice President of ShoreFit. “An industry insider, speaking on the condition of anonymity, related to us ‘It’s a fool who believes that these collapse events, be it partial or full collapse scenarios, aren’t playing out multiple times a month across the country.’ ShoreFit exists to ensure that first responders are fully equipped in advance to safely and quickly reach someone in need of rescue should the unthinkable happen on their watch.”

ShoreFit is thoughtfully designed with these innovative features:

- **No Tools Required!**
- Easy 3-Step Assembly Instructions Included on Product Case
- Deployed **with Your Gloves on in Minutes!**

## About ShoreFit

ShoreFit was established in 2024 by Carole Klinger, a 27-year veteran fire fighter and her husband Daniel Klinger, President and Founder of MTAC Industrial Solutions. Their unique skill sets and insights, gleaned from decades of experience in their respective fields, make them uniquely equipped to both recognize and address a glaring need in the first responder toolkit: The ability to more safely engage pallet rack frames in the event of a pallet rack collapse. The ShoreFit Shoring Strut to Pallet Rack Adapter enables a safer way to reliably engage these compromised structures with the shoring struts that first responders would typically use in such an event.

## About MTAC Industrial Solutions

Founded in Indianapolis, Indiana in 1999 by Daniel Klinger, MTAC Industrial Solutions is a subject matter expert in the space of pallet rack and rack collapse prevention with decades of experience in warehouse safety innovations, and a focus on pallet rack maintenance and repair. MTAC inspects, repairs, and maintains hundreds of thousands of frames, and the hugely diverse rack systems they support, in facilities all across the United States.
