RE: ShoreFit Adapter Assembly Load Rating

Daniel,

After reviewing the drawing and performing calculations, I have concluded that each **ShoreFit Adapter Assembly** is capable of supporting a load of at least:

**5,000 pounds**

This includes a factor of safety of 3.0.

Attached to this letter is a drawing of the overall assembly.

If you have any questions or need anything further, please feel free to contact me.

Sincerely yours,

DAVE POLAND ENGINEERING, LLC

David S. Poland, P.E.
